International Relations

TENTH EDITION

Joshua s. Goldstein           Jon C. Pevehouse

Thoroughly updated to cover world affairs through 2012, International Relations is praised for being the most current and comprehensive introduction to international relations theory as well as security, economic, and global issues. From war and trade to human rights and the environment, this survey explores relations among states and the influence of transnational actors and events. Applying a broad range of theoretical perspectives to show students how to analyze current events, International Relations offers the best tools for understanding what is happening in the world today.

• The most up-to-date analysis of world affairs available in any introductory text helps students learn about—and analyze—political, economic, and cultural events throughout the world. Thoroughly updated to cover world affairs through 2012, the 2012–2013 Update covers the Arab Spring uprisings, the U.S. killing of Osama bin Laden, the U.S. withdrawal from Iraq, the escalating European financial crisis and the struggle for the future of the euro zone, the success of Russia’s quest to join the World Trade Organization, the growth of the world’s population past seven billion, and much more.

• Tables and figures portray the most recent data, including new data on GDP after the global recession, migration and refugees, debt in the developing world, the HIV/AIDS epidemic, UN peacekeeping operations, and more.

• Numerous new photos from 2011 draw visual attention to current events while reinforcing key concepts in the text.

Readings in International Relations pairs writings on international relations theory with writings on current events to help students explore the relationship between concept and application. To order, use ISBN 0-321-35619-5.
